

## People, Partnerships and Technology

*We provide IT business solutions to enable companies to reach their business goals. Our spectrum of technology services is supported by the best people, partnerships and technology.*

IntelliMark is a national leader in technology services, providing cutting edge network and engineering solutions as well as top-line information technology recruiting and staffing solutions. IntelliMark enables clients to improve efficiency, security and regulatory compliance. With seven locations in the United States and offshore capabilities in India, IntelliMark's spectrum of services ranges from IT life cycle services to engineering solutions.

IT life cycle services include full life cycle solutions and component life cycle solutions, plus a full range of engineering solutions including full cycle services for specific industries and component services for various manufacturing applications.

We also provide IT consulting and staff augmentation through our people resource company, Technisource. Our paramount mission is to enable you, our client, to reach your business goals.

Contact IntelliMark today to explore technology services customized for your organization.
